Response to Amendment

1. Claims 1-17 are allowed.
2. The following is an examiner's statement of reasons for allowance:

In regard to:

Claims 1-6 and 16:

The primary reason for the allowance of claims 1-6 and 16 is the inclusion of the limitation of the sensor wiper is oscillated by the wiper driving portion by a predetermined amplitude to clean the surface of the sensor. It is this limitation found in each of the claims, as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

Claims 7-15 and 17:

Please refer to office action dated Aug. 20, 2004.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6,585,349 B1, "Automated removal of deposits on optical components in printers" issued to Lou et al., July 1, 2003 teaches in their fig. 6 a wiper (6) used to wipe clean an optical component (8) in an ink jet printer, the optical component moves on top of the wiper by a carriage to which the optical component is mounted, the wiper is then move upward by a driving source to make contact with the optical component, then the carriage moves back and forth to allow the wiper to clean the optical component.

The teaching of this reference is closed to the instant application, however, Lou et al.'s wiper does not oscillate, i.e., stand still.
